

Tyres

If used frequently, oil the wheelsets with a drop of non-resinous, acid-free sewing machine oil! In order to achieve the best possible running and traction properties, it is advisable to run the locomotive in for 25 minutes forwards and 25 minutes in reverse without load. Clean rails are essential for good performance, and 25 minutes in reverse without load. Clean rails are essential for good performance.

Please note that the Rail car has the locomotive address 3 for problem-free switching of the various functions ex factory.

After a reset of the decoder, all default configurations are overwritten! Therefore, please only do a reset in case of an important and urgent emergency. If you still reset your decoder, you eventually have to reprogram the individual function mapping (see FAQ for more information)!
